

## Lisa Rinne – Technical requirements – “Fallen”

Artists:	1 + 1 support.
Duration:	+/- 6,5 minutes.
Transport:	Access with a van until close to the performance place must be guaranteed.
Sound:	An appropriate sound system for CD and MP3-Player and competent, technical support must be provided.
Music:	Will be provided on CD or on a MP3-Player. Copyright regulations must be satisfied by the organizer. A list of the used music is available upon request.
Audience:	For security reasons, the audience must be seated outside the performance space. Appropriate seating possibilities as well as material to secure the area (e.g. rope) must be provided.
Space:	Please refer to attached technical plan. Instead of the installation of a „Barre d'écart“ (bar which keeps a distance to the ceiling,), it is of course possible to rig the trapeze directly to a preexisting truss in 7 m height minimum, as long as the distance to the ceiling is min. 1.5 m and a free corridor (swinging space) of 8,5 m height, 3 m width and 6 m length in front and behind the trapeze (→total length: 12 m) exists.
Light:	For night shows, an adequate light setting and competent technical support must be provided.
<b><u>Important:</u></b>	The attached technical plans are integral part of the technical requirements.
